

DATASPIRE GAME PROGRESS DOCUMENTATION

Kenneth W.

Vance B.

August 27, 2024

2023	
SEP. 16	Soft start, initial documentation and GitHub repository created.
OCT. 10	Documentation update with additional information.
DEC. 27	Development started in Godot, initial prototyping for the movement system.
DEC. 30	Advanced player movement: Dashing, Bunny-hopping, Sliding, Crouching, and Jumping.
2024	
JAN. 07	Prototype movement system complete, further refinement in progress.
FEB. 26	Movement system rework #1 complete. Notably, the stair-stepping functionality was updated.
MAR. 06	Movement system rework #2 complete. Notably, the number of movement options was reduced to put more emphasis on the fundamental movement options.
APR. 08	Project refactor #1 complete. Re-organized file layout and switched from Qodot 4 addon to Func_Godot addon for Trenchbroom map importing.
APR. 15	Player HUD: Dash charges, Healthbar, Motion lines, etc.
APR. 29	Map interaction: Cratering, Portals, Water, Ziplines, and Ladders.
MAY. 10	1st Weekly Meeting: Enemy AI prototyping, Navigation mesh creation, Combat prototyping.
MAY. 17	2nd Weekly Meeting: Elemental combat prototyping, User interface, Combat mechanics, and game aesthetic.
MAY. 31	3rd Weekly Meeting: Enemy AI work, Virus, Malight, and ICEMAN AI navigation.
AUG. 07	Began work on allowing AI to navigate vertical (walls, ceilings) surfaces with custom navigation regions.
AUG. 08	Finished vertical AI navigation work. Began work on the new command/debug console.
AUG. 09	Reworked main character's backstory to justify attack animations. Continued work on new command/debug console. Reworked player controller to allow for different orientations (dynamic gravity). Fixed a glitch where you could steer the character while sliding.
AUG. 10	Fixed the scaffold metal material being opaque when behind water. Finished player controller rework.
AUG. 19	Updated DATASPIRE to Godot 4.3. Fixed broken shaders as a result of update. Fixed incorrect player position as a result of update. Fixed incorrect player orientation and gravity calculations (mainly incorrectly used up_direction and gravity_vector).
AUG. 20	Refined the water shader and experimented with different versions.
AUG. 22	Added additional commands to command/debug console. Pushed all changes to combat-elements branch.
AUG. 25	Concept art and art reference storage reorganizied.
AUG. 27	Added additional documentation. Pushed to combat-elements. Merged with main.
